

TO REGIONAL COMMUNICATIONS / APPROVED SPOKESPEOPLE

Continuity statement

LORE DRAFT / FICTIONAL DOCUMENT / STORY SPOILERS

RELEASE COPY / HELD FOR APPROVAL

ATLAS Consolidated confirms that access has been restored following a temporary disruption at a managed facility. Essential infrastructure remains operational. A personnel review is continuing through the appropriate local channels.

IF ASKED ABOUT THE WORKERS

Acknowledge that the personnel review is incomplete. Do not describe restoration of access as confirmation that every worker has been accounted for. Do not release a count until the responsible office has reconciled its records.

INTERNAL DISTRIBUTION NOTE

The release is cleared for infrastructure status only. The service corridor report and contractor supply exception are not included in the press packet. Questions concerning contractor identity are to be forwarded to the issuing organizations.

EDITORIAL ANNOTATION

Retain "temporary disruption" in the headline. The approved subject is continuity of service. Details of the evacuation remain with site security, even where those details explain the disruption.

RELEASE CONDITION

Publish after confirmation that the access point has reopened. Completion of the personnel review is not a release condition. Keep the review described as ongoing until a separate statement is authorized.

ARCHIVE NOTE

Proposed NULL SECTOR fiction. Read alongside the civilian movement report: the public statement can be technically accurate while leaving the human cost outside its frame.
