

TO CRIMSON SHIELD / PROCUREMENT DESK

Supply exception

LORE DRAFT / FICTIONAL DOCUMENT / STORY SPOILERS

REQUEST

Replacement equipment is required after the service corridor incident. The delivery was held when the receiving clerk found two different contractor references on the same dispatch record.

RECEIVING CLERK

The outer label names Crimson Shield. The enclosed routing sheet names Sentinel. Both carry the same return authorization. Please confirm the recipient before the seal is broken. The discrepancy concerns the paperwork; the contents have not been inspected.

PROCUREMENT RESPONSE

A shared logistics service does not establish a shared assignment. Accept only the items listed against our requisition. Retain the routing sheet with the exception record and keep the requisition number in field correspondence.

UNRESOLVED QUESTION

The corrected dispatch changes the recipient name but preserves the original authorization. The receiving clerk has requested the identity of the authorizing office. No response is attached.

DISPOSITION

Replacement request remains open. Delivery acceptance is conditional on a corrected manifest. Do not infer the affiliation of personnel at the corridor from a shipping label.

ARCHIVE NOTE

Proposed NULL SECTOR fiction. Shared paperwork is a clue, not proof on its own. This record connects to the civilian movement report and continuity statement in this draft collection.
