

TO SITE SECURITY / SHIFT SUPERVISOR

Civilian movement report

LORE DRAFT / FICTIONAL DOCUMENT / STORY SPOILERS

RECORD / SERVICE CORRIDOR INCIDENT

Filed by Vanguard site security. The corridor was cleared and the access point returned to service. No equipment loss was recorded. The personnel count remains unconfirmed.

SEQUENCE

Workers moved toward the same exit after hearing shots beyond the checkpoint. The camera view became obstructed. An armed person crossed the corridor with the crowd; the recording does not establish which organization they belonged to.

WITNESS ACCOUNT

A worker reported: "We were told to keep the doorway clear. Everyone behind us was being told to leave." The statement has been retained with this report. It does not appear in the incident summary.

SUPERVISOR ANNOTATION

The summary records an obstruction, not an evacuation. Review the conflicting instructions before assigning responsibility to the workers. The restored access point does not account for the people who did not return to their stations.

DISPOSITION

Access restored. Asset inspection complete. Personnel reconciliation pending. The incident summary may be closed independently of the personnel review.

ARCHIVE NOTE

Proposed NULL SECTOR fiction. This incident connects to the continuity statement and supply exception in this draft collection. It does not establish a playable mission or new mechanic.
